Subject: Microsoft Action

I cannot believe that we as a government could lie down as Microsoft rips through our economy. I watch as Microsoft removes all of their competitors from the market. Not by having a better product but by breaking other programs compatibility with windows and bundling their own ripped copy of the same software with their name on it, By threats and by giving a product away for free until after their competitors are out of business. It was interesting to note that after moving a machine from an older version of windows to the new version other chat programs no longer work, save for Microsoft's messenger service. Your current idea of forcing Microsoft to do give away computers to poor schools is the most ridiculous idea I have ever heard!

You obviously are going to be Microsoft's PR reps huh?
Hey, Microsoft it is ok to forcibly put all of your competitors out of business...
All you have to do is give a few computers away and we the government will turn a blind eye to any illegal actions you take, break the law see if we care.

If this bull goes through, it will be a sad day for America! On that day I will be ashamed to be referred to as American, for we are only telling the world that with a few dollars you don't have to obey the laws of our country. Break up the darn company! Show the world that we will stand up and protect our market, our laws, our principles and our country!
